

Box plot showing the distribution of sulfur content (S) for six different sulfur compounds: S150, S0, 4MTB, allyl, PhE, and I3G. The y-axis represents sulfur content, ranging from 0 to 100. S150 and S0 show very low sulfur content (near 0). 4MTB shows a wide distribution with a median around 50. allyl, PhE, and I3G show moderate sulfur content, with medians around 40, 45, and 40 respectively.

Sulfur Compound	Min	Q1	Median	Q3	Max	Outliers
S150	0	0	0	0	0	None
S0	0	0	0	0	0	None
4MTB	10	40	50	65	100	75, 85
allyl	20	35	40	45	50	10
PhE	30	35	45	50	55	None
I3G	40	40	40	40	40	None
